RE-ENGINEERING AMERICA.

ARCHITECTURE. ENGINEERING. TECHNOLOGY. CONSULTING.

Kimball leads the charge

All across America, a new energy is propelling the development of energy-efficient buildings and advanced technology – and Kimball is helping to lead the charge.

The federal Recovery and Reinvestment Act provides \$16.8 billion for energy-efficiency and renewable energy

A NEW ENERGY FOR OUR FUTURE.

projects, including development of a smart electrical grid, investment in renewable energy technology, and repair of federal structures and schools to increase energy efficiency. Kimball is assisting government agencies, businesses, utility companies, schools and other institutions that seek to participate in this program; and we may be able to help your organization identify opportunities for federal funding.

Benefit from Kimball's energy

We have been planning, designing and building infrastructure and energy-related projects for over half a century, and we remain one of the nation's most energetic professional firms in the program to re-engineer America. Kimball clients continue to call on our deeply experienced professionals because of our size, scope, stability and diverse capabilities.
